EDUCATION

University of Colorado Boulder, Boulder — *BA in Computer Science*

GPA 3.8 | Graduated magna cum laude

AUGUST 2024 - MAY 2026

Front Range Community College, Fort Collins — *Transfer AS in Computer Science*

GPA 3.9 | Graduated magna cum laude

JUNE 2021 - MAY 2025

WORK EXPERIENCE

Front Range Community College, Fort Collins — *Supplemental Instruction Leader*

AUGUST 2023 - MAY 2024

- Sat in on precalculus classes and assisted students.
- Hosted one hour sessions outside of class time each week and answered students' questions.
 - Created worksheets and session plans.
 - Managed the needs of individual students
- Communicated regularly with the professor.

Cognizant, Englewood — *Associate Intern*

JUNE 2025 - AUGUST 2025

- Served as both Backend Developer and Product Owner on a full-intern agile development team.
- Built AI-driven automation to improve insurance claims analysis and reduce manual review effort for analysts.
- Implemented Azure AI Document Intelligence to extract and structure data from insurance claims.
- Used Azure AI Studio to automate population of key claim data into Excel for analysts.
- Developed a chatbot enabling users to query uploaded documents and access information quickly.

TECHNICAL SKILLS

Languages:

Java, JavaScript, Python, C++, C, SQL (MySQL), HTML5, CSS3

Frameworks/Libraries:

React.js, Tailwind CSS, Bootstrap

Developer Tools:

Git, GitHub

Concepts:

Object-Oriented Programming, Data Structures & Algorithms, Object-Oriented Design Patterns, Agile Development

- Defined weekly priorities, estimated work with story points, and managed the product backlog.
- Acted as a liaison between stakeholders and developers, balancing business goals with technical scope and timelines.

PROJECTS

Pseudo x86 assembler — *Assembly language class project*

- Constructed a pseudo x86 assembler in C over the course of the semester.
- Wrote ASM code for the assembler to run. Examples include:
 - A program to take in numbers and insert them into an array that may vary in size, then sort in ascending order.
 - A program that takes numbers 0-100 which are passed by reference to a memory location also passed in by reference.
 - A program that adds 10 user-inputted numbers and outputs the sum.

Buff's Bulletin — *Software dev methods and tools group project*

- 6-week intensive group project to allow students to add events to a map of the CU Boulder campus and explore and RSVP for upcoming events.
- Website with login/logout functionality, a database for users and events, functional map using the Mapbox API. Users can add friends and view the events they are attending.
- Dynamic panels to display events either in a list or as pins on the map with filtering options.
- Programming the UI with one other group member, as well as working on integration with the backend.

Snake — *C++ final project*

- Programmed a text-based version of the game Snake in C++ that ran in the Visual Studio command console.
- Tracked points earned during gameplay and output them at the end of the game.
- Took live keyboard input for movement.
